Summary

Full-stack Web developer well versed in HTML, CSS, JavaScript, Node.js, React, and PostgreSQL. Through a combination of individual projects and collaborative teamwork, I honed my skills in crafting web applications. The agile work environment I learned in fostered a dynamic and efficient workflow, teaching me how to adapt quickly and collaborate effectively with my peers.

Education

DigitalCrafts - Software & Full Stack Development

Graduated: July 2023

- Gained proficiency in JavaScript, HTML, CSS, and related skills through training and hands on learning.
- Collaborated with teammates on various projects to apply skills in real-world scenarios.
- Worked in an agile environment, enhancing adaptability and project management abilities.
- Built numerous projects under the guidance of DigitalCrafts instructors.

Recent Projects

Govindas - A website built for a vegan restaurant in Houston

[Live Site](#) | [GitHub](#)

- Tech Stack: React, Redux, JavaScript, CSS, Styled Components, PostgreSQL.
- Led the team in an agile environment by having managed the GitHub repository, handled deployment of frontend and backend, and created tickets for bugs and issues that needed to be corrected.
- Designed reusable components such as the gift card, review, contact us, and today's menu sections.

Simply Shop - E-commerce website that sells electronics

[Live Site](#) | [GitHub](#)

- Tech stack: JavaScript, Html, Tailwind CSS, ES6 Renderer, PostgreSQL.
- Designed a PostgreSQL database with a table storing prices, images, names, and IDs for all our products for our website.
- Designed the landing products page and individual product page for all our products coming in from our DB
- Handled deployment of our website using Render for the frontend and ElephantSQL for our database.

Pokémon TCG - A trading card website built around the game Pokémon

[Live Site](#) | [GitHub](#)

- Tech stack: React, JavaScript, Redux, Vite.
- Created fetch calls to the Pokémon Api to get all JSON data for the card information.
- Mapped over the JSON data to create individual cards with price details, rarity, and the set it belongs to.

Experience

Appliance Genius - Service Technician

Aug 2020 - Present

- Maintained certifications and completed training on systems and components.
- Troubleshoot malfunctions and diagnosed issues to service equipment quickly and fully.
- Filled out work orders, repair logs, and maintenance plans to document work completed.
