Portfolio | **GitHub** | **LinkedIn**

Summary

Full-stack Web developer well versed in HTML, CSS, JavaScript, Node.js, React, and PostgreSQL. Through a combination of individual projects and collaborative teamwork, I honed my skills in crafting web applications. The agile work environment I learned in fostered a dynamic and efficient workflow, teaching me how to adapt quickly and collaborate effectively with my peers.

Education

Digital Crafts   Graduated: July 2023
Software Development: **Full Stack Web Development**
I acquired proficiency in JavaScript, HTML, CSS, and other related skills listed below through comprehensive training and hands-on learning.

Skills

Debugging, PSQL, SQL, HTML5, CSS, Java Script, Node.js,Git, Redux, React, Figma, Flexbox, BootStrap, Tailwind CSS,Netlify, Vercel, Vite, Agile, Project management, Attention to Detail, Debugging, Problem resolution.

Recent Projects

Govindas   **Live Site** | **GitHub**

Govinda's is a project highlighting everything I have learned at DigitalCrafts. This was a collaborative project with John Garcia and Camilla Wilson. We built this project for a real restaurant here in Houston and are handing this over to them. It was built with React and brought to life from a Figma File.

Simply Shop   **Live Site** | **GitHub**

This was a collaborative project with my two classmates John Garcia and Michael Jones. We built an E-Commerce website that sales electronics. It is a backend project using es6-renderer and Tailwind for styling. The images were all created using a AI image creator. My main duties in this team was building the database and building out our products page getting everything appended from our database.

Pokémon TCG   **Live Site** | **GitHub**

This was a solo React project I built that utilizes a Pokémon card database api and gathers images as well as info on how much these cards are valued at and will provide a link to a website where you can purchase the cards.

Experience

Appliance Genius August 2020 to Current   Alvin, TX
Service Technician

- Maintained certifications and completed training on systems and components
- Troubleshot malfunctions and diagnosed issues to service equipment quickly and fully
